/\* Question Set 3 - Advance \*/

/\* Q1: Find how much amount spent by each customer on artists? Write a query to return customer name, artist name and total spent \*/

/\* Steps to Solve: First, find which artist has earned the most according to the InvoiceLines. Now use this artist to find which customer spent the most on this artist. For this query, you will need to use the Invoice, InvoiceLine, Track, Customer, Album, and Artist tables. Note, this one is tricky because the Total spent in the Invoice table might not be on a single product, so you need to use the InvoiceLine table to find out how many of each product was purchased, and then multiply this by the price for each artist. \*/

```
WITH best_selling_artist AS (  
    SELECT artist.artist_id AS artist_id, artist.name AS artist_name,  
    SUM(invoice_line.unit_price*invoice_line.quantity) AS total_sales  
    FROM invoice_line  
    JOIN track ON track.track_id = invoice_line.track_id  
    JOIN album ON album.album_id = track.album_id  
    JOIN artist ON artist.artist_id = album.artist_id  
    GROUP BY 1  
    ORDER BY 3 DESC  
    LIMIT 1  
)  
SELECT c.customer_id, c.first_name, c.last_name, bsa.artist_name,  
SUM(il.unit_price*il.quantity) AS amount_spent  
FROM invoice i  
JOIN customer c ON c.customer_id = i.customer_id  
JOIN invoice_line il ON il.invoice_id = i.invoice_id  
JOIN track t ON t.track_id = il.track_id  
JOIN album alb ON alb.album_id = t.album_id  
JOIN best_selling_artist bsa ON bsa.artist_id = alb.artist_id  
GROUP BY 1,2,3,4  
ORDER BY 5 DESC;
```

/\* Q2: We want to find out the most popular music Genre for each country. We determine the most popular genre as the genre with the highest amount of purchases. Write a query that returns each country along with the top Genre. For countries where the maximum number of purchases is shared return all Genres. \*/

/\* Steps to Solve: There are two parts in question- first most popular music genre and second need data at country level. \*/

/\* Method 1: Using CTE \*/

```
